CITES and the Wood Products Trade – November 2000

Enclosed are the files needed to modify the brochure CITES and the Wood Products Trade. The brochure was originally designed and printed in English, Spanish, Portuguese, and French. Images of the brochure in the above languages are on the CD as PDF files if a country wishes to simply print more copies of the brochure. Countries are encouraged, however, to translate the text while using the existing format and images to print the brochure in their own language. For that purpose, PageMaker files have been provided.

It is intended that an inexpensive country specific insert be printed and inserted into the brochure. This would contain relevant contact information for the CITES Office of Management Authority, and other NGOs that could help the reader find more information. A list of approved ports of entry for CITES products might also be included. An example of such an insert was sent to the CITES authorities in each country along with a few hundred copies of the brochure in the later part of 2000.

PageMaker 6.5 or later versions for Macintosh and Windows desktop publishing is needed to manipulate the files to modify the brochure for 4-color process printing. All linked tiff files and fonts in the parent PageMaker document are included on this disk in the Link & Fonts folder.
